

GAURAV DESHMUKH

Data Analyst | Business Intelligence (BI) Analyst | MIS Analyst | BI Developer

gauravdeshmukh332@gmail.com | +91-7972232981 | Pune, Maharashtra | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Results-driven Data Analyst and Business Intelligence (BI) professional with 3+ years of experience in SQL Server, Microsoft Power BI (DAX), Microsoft Excel, and Python. Proven track record of building end-to-end BI solutions, automating ETL workflows, and delivering KPI dashboards that drive strategic decisions. Hands-on experience with Microsoft Azure services including Azure SQL Database, Azure Data Lake Storage Gen2, and Power BI Service deployment. Familiar with Agile/Scrum methodology and cross-functional delivery workflows. Strong analytical thinking, stakeholder communication, and data storytelling skills. M.Sc. Data Science — Symbiosis International University, Pune.

TECHNICAL SKILLS

Data Analysis & Business Intelligence (BI): Microsoft Power BI (DAX, Data Modeling, Report Development), SQL Server (Joins, CTEs, Aggregations, Window Functions), Microsoft Excel (Advanced Formulas, Pivot Tables, VLOOKUP, HLOOKUP, Power Query, Conditional Formatting, Dashboard Design)

Programming & Development: Python (Pandas, NumPy, Matplotlib, Seaborn, Data Cleaning, Exploratory Data Analysis), SQL, Power Query M Language, Power BI Desktop, Power BI Service, Tableau, GitHub

Cloud & Microsoft Azure: Azure SQL Database, Azure Data Lake Storage Gen2 (Bronze/Silver/Gold Medallion Architecture), Azure Data Factory (Pipeline Concepts, Copy Activity, Linked Services, Triggers), Azure Synapse Analytics (Serverless SQL Pool, OPENROWSET Queries), Power BI Service (Dashboard Publishing, Scheduled Refresh, Row Level Security, Workspaces)

Concepts & Methodologies: Star Schema Design, ETL (Extract Transform Load) Processes, Data Warehousing, KPI Analysis, MIS Reporting, Business Intelligence Reporting, Data Visualization, Dashboard Automation, Data Storytelling, Time Intelligence Analytics, Requirement Gathering, Report Automation, Data Cleansing, Data Governance Basics, Agile/Scrum Methodology

Soft Skills: Analytical Thinking, Problem Solving, Communication Skills, Stakeholder Management, Attention to Detail, Critical Thinking, Team Collaboration, Time Management, Adaptability, Presentation Skills, Data Storytelling, Cross-functional Collaboration, Self-motivated, Fast Learner

PROFESSIONAL EXPERIENCE

Data Analyst | **Maximize Market Research Pvt. Ltd., Pune**

June 2023 – Present

- Performed end-to-end data analysis on market and sales datasets using SQL Server and Microsoft Excel, generating actionable business insights for 10+ consulting and research projects across multiple industry verticals.
- Designed and developed interactive Power BI dashboards using DAX measures and data modeling, reducing manual reporting time by ~30% through automated data refresh and Power Query ETL workflows — directly improving team productivity.
- Built MIS reports and KPI dashboards in Microsoft Excel (Pivot Tables, Advanced Formulas, Charts) to track market size, CAGR, regional contributions, and business performance metrics for client deliverables.
- Conducted competitor analysis and financial benchmarking across 5+ industry sectors, developing detailed company and industry profiles that supported strategic decision-making for clients.
- Collaborated with cross-functional stakeholders and business teams to gather requirements, translate them into analytical reports, and present insights — demonstrating strong communication skills and stakeholder management.
- Prepared executive-level presentations translating complex datasets into clear, compelling data stories, improving data-driven decision-making for senior leadership across teams.
- Applied critical thinking and attention to detail to identify and resolve data quality issues, ensuring accuracy and consistency across all reporting outputs and client deliverables.

Data Science Intern | **Yoshops, Pune**

Dec 2022 – Feb 2023

- Performed data preprocessing and cleaning on real-world datasets — handling missing values, removing duplicates, and standardising formats to ensure data quality for downstream analysis.
- Conducted Exploratory Data Analysis (EDA) using Python (Pandas, NumPy, Matplotlib, Seaborn) to identify patterns, outliers, and statistical trends across multiple datasets.
- Built and evaluated Machine Learning models in Python covering Classification, Regression, and Clustering — selecting appropriate algorithms based on data characteristics and business objectives.
- Applied statistical techniques for feature engineering and model validation; visualised insights using Matplotlib and Seaborn to communicate findings clearly to the team.

BI & DATA ANALYTICS PROJECTS

Sales Analytics & BI Dashboard — End-to-End Business Intelligence Solution

SQL Server · Microsoft Power BI · DAX · Power Query · Star Schema · Azure SQL · Python · GitHub

GitHub: github.com/gauravdeshmukh18/Superstore-Sales-Analytics | Power BI: [View Live Dashboard](#)

- Designed and implemented a star schema data model in SQL Server, normalising a flat dataset into 4 relational tables (Customers, Products, Orders, Order_Items) with primary and foreign key constraints — demonstrating strong data warehousing and database design skills.
- Wrote advanced SQL queries using CTEs, Window Functions (RANK, DENSE_RANK, LAG, Running Totals), and multi-table JOINS to extract, validate, and stage KPIs before loading into Power BI — showcasing end-to-end data pipeline ownership.
- Developed 15+ DAX measures, including Total Revenue (\$2.3M), Profit Margin %, Month-over-Month (MoM) Growth %, Year-over-Year (YoY) Growth %, Running Revenue Total, Average Order Value (AOV), RANKX Top 10 Customer Ranking, Category Contribution %, and Repeat Customer Rate using time intelligence functions (DATEADD, SAMEPERIODLASTYEAR).
- Designed a 3-page interactive Power BI dashboard (Sales Performance, Customer Analytics, Product Performance) with executive KPI cards, revenue trend analysis (current vs. previous year), regional map visuals, profitability segmentation, and dynamic slicers for Region, Segment, Year, and Month.
- Delivered actionable insights: identified high-revenue but low-margin segments, customer dependency risks (top 10 customers = 35%+ of revenue), and category-level profitability gaps — demonstrating strong data storytelling and business acumen.
- Migrated star schema to Azure SQL Database; deployed on Power BI Service with scheduled refresh; documented complete workflow (SQL scripts, data model, DAX measures) on GitHub — simulating a real enterprise cloud BI deployment pipeline.

Executive Market Dashboard — Watertube Boiler & Burner Industry

Microsoft Excel · Power Query · Data Visualisation · Market Research

- Created an executive-level Microsoft Excel dashboard analysing global market data across 6+ regions and 4 segments for a client-ready deliverable — demonstrating advanced Excel and data visualisation skills.
- Implemented Power Query workflows for data cleaning, transformation, and automated refresh — reducing manual data preparation time by approximately 40% and improving data accuracy.
- Developed interactive KPIs including market size, CAGR, and regional contributions; presented findings to client leadership, demonstrating strong presentation skills and stakeholder communication.

Competitor Analysis Dashboard — Market Intelligence Report

Microsoft Power BI · DAX · Microsoft Excel · Market Research

- Built an interactive Power BI dashboard for competitor benchmarking, analysing performance metrics, pricing trends, and market positioning across 8+ industry players.
- Applied DAX measures and data modelling to visualise competitor KPIs, enabling the research team to deliver strategic insights 50% faster compared to previous manual reporting methods.
- Translated qualitative market research data into structured visual BI reports, demonstrating strong analytical thinking and business intelligence reporting skills.

EDUCATION

Master of Science (M.Sc.) — Data Science — Symbiosis International (Deemed University), Pune

Dec 2025

Bachelor of Engineering (B.E.) — Savitribai Phule Pune University, Pune

April 2020

CERTIFICATIONS

Deloitte Australia Data Analytics Job Simulation — Forage

March 2025

- Completed end-to-end analytics simulation covering data analysis, Tableau dashboard creation, and Microsoft Excel-based business insights reporting in a simulated consulting environment.
- Demonstrated problem-solving, critical thinking, and data storytelling skills — building professional-grade dashboards under real-world time-bound conditions.
